

# Health Workforce Wellbeing Day at the Arizona Capitol - March 18

Supporting the people who care for Arizona

## Why this matters

Arizona's healthcare system depends on the wellbeing of the people who care for our communities— nurses, physicians, pharmacists, public health professionals, students, and all health professionals. Burnout, staffing shortages, and financial strain are pushing talented professionals out of the workforce just when Arizona needs them most. On March 18, health leaders, legislators, students, and advocates will gather at the Capitol to elevate health workforce wellbeing as a policy and workforce priority.

## What to expect

- ✓ Recognition of legislative leaders advancing wellbeing
- ✓ Poster Conversations from physicians, nurses, public health leaders, and students
- ✓ Updates on workforce initiatives, loan repayment programs, and retention efforts
- ✓ Lunch, networking, and connections across sectors

REGISTER HERE
